Hazardous Weather

Winter Weather Returns!

Amarillo

Timing:

- ❖ Periods of rain and snow this afternoon through Saturday afternoon.
- ❖ Some sleet may mix in tonight.

Amounts:

- ❖ 1 to 3 inches of snow possible, especially near the New Mexico border.

Hazards:

- ❖ Hazardous travel conditions may develop.

NWSAmarillo @NWSAmarillo weather.gov/ama

Rain and snow chances will increase later today and continue through Saturday afternoon across the area. The best chance of snow accumulations will be across the western portion of the Texas and Oklahoma panhandles with the highest amounts occurring near the New Mexico border.

Cool and Wet Today and Tomorrow

Much cooler and unsettled weather will return today and tomorrow as a slow moving storm system approaches the region. The best chance for widespread precipitation should develop late this evening into tonight. Some snow is also expected, and could accumulate up to a few inches across the southwest Texas Panhandle and northwest South Plains.

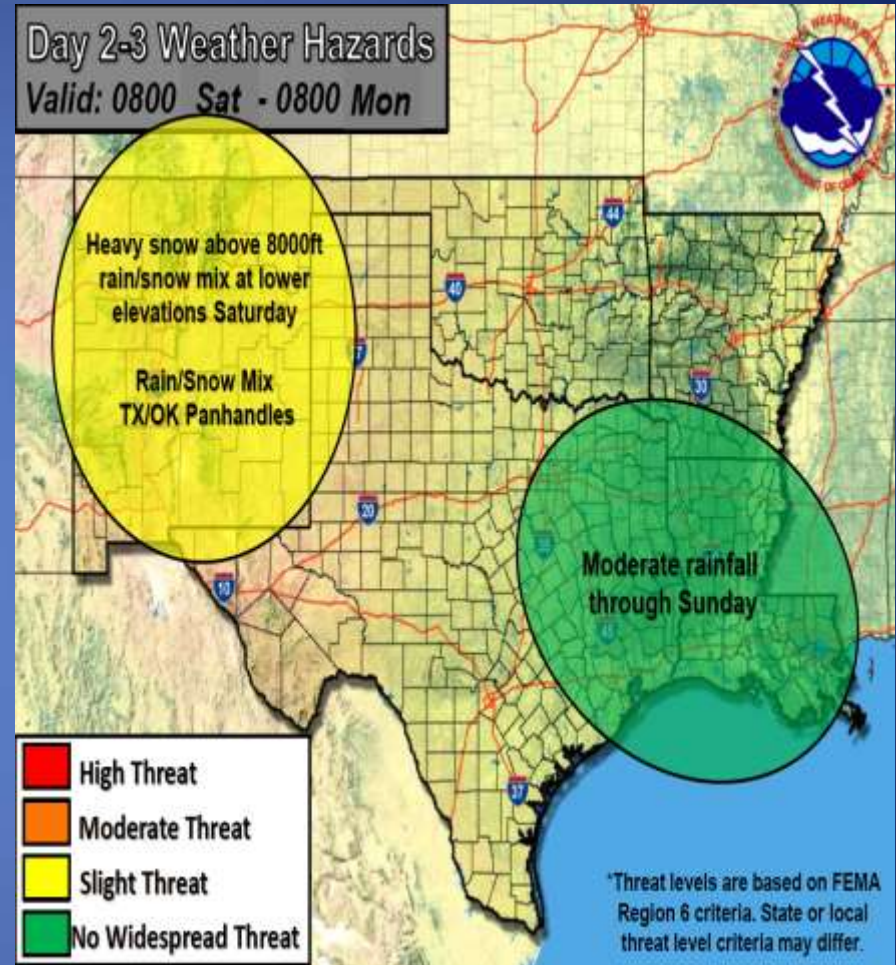

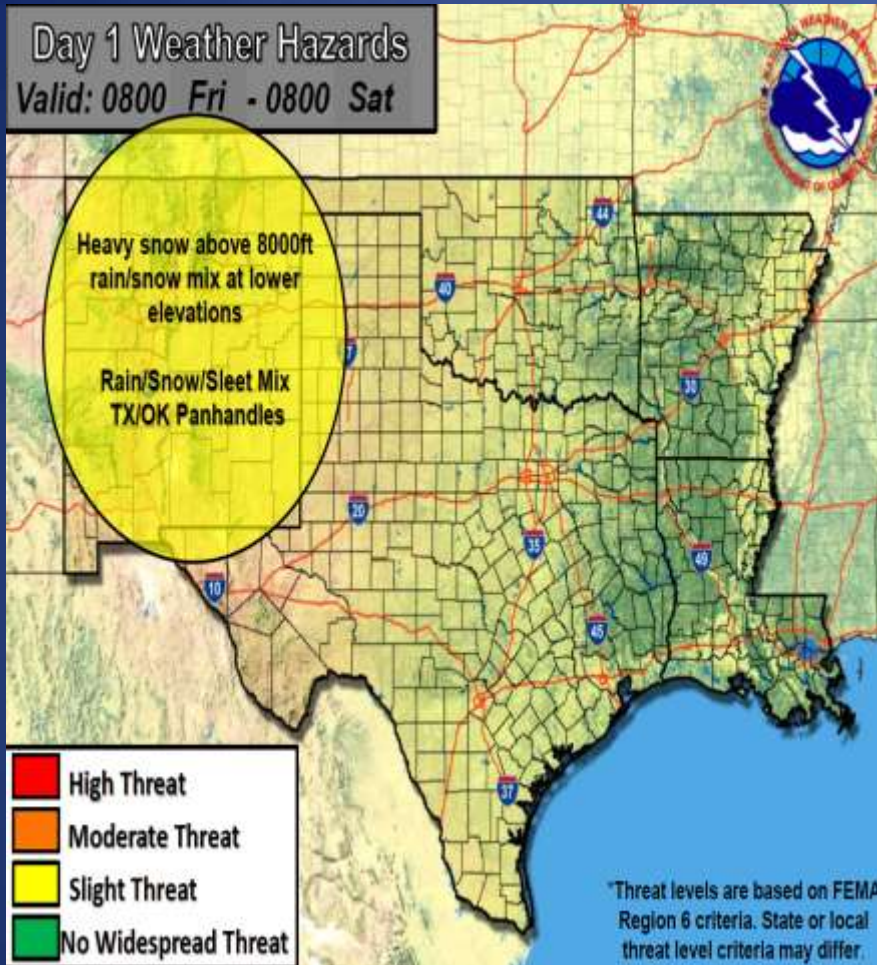

Hazardous Weather

Wet weather conditions will prevail over the lowlands as a low pressure system brings abundant moisture to the region. Periods of moderate rain and mountain snow will continue through the day. Rain amounts up to an inch and half may occur across the area. Snow amounts for elevations above 7000 feet in the Gila Region and the Sacramento Mountains will vary between 6 and 15 inches. Lesser amounts of snow of 1 to 3 inches may occur at elevations between 6000 feet and 7000 feet. Temperatures will be much colder with mid 40s expected for most lowland areas with mid to lower 30s in the mountains. A winter storm warning will be in effect for the mountain areas through Saturday night.

Hazardous Weather

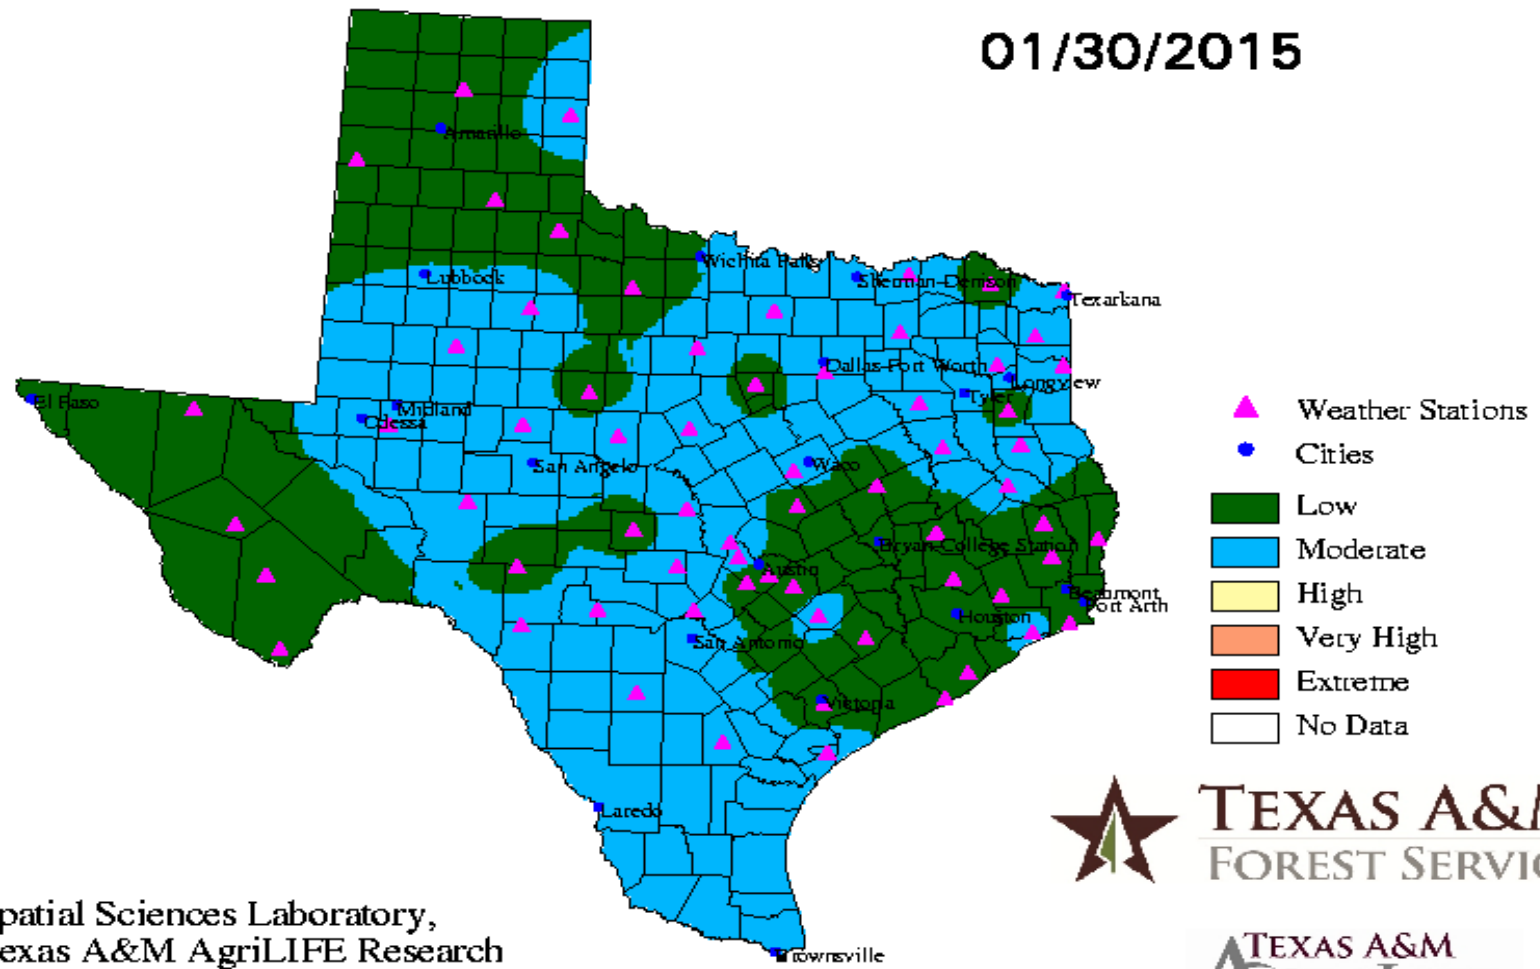

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
